GRAY'S NEW PATENTED Cotton and Hay Press

THE latest, and by far the cheapest and most perfect Cotton Press ever invented. One mule, with the greatest ease, can pack a bale of 750 pounds. The Press is made of Iron, the levers do not rise and fall. The advantages of this patent over all others are as follows:

- 1st.—Anti-friction Revolving Nut, with Friction balls, by which the friction is taken entirely from the screw.
- 2d.—The levers are bolted directly to the nut, and thus direct power is obtained on the nut, and the screw is relieved from the twisting strain upon all screws now in use.
- 3d.—The screw being fixed permanently to the follower block, is relieved from friction, to which all revolving screws are subjected.
- 4th.—The frame to which this screw is attached, is put together with morticed dovetails and keys, making it strictly portable. It can be put up, ready for use, in one hour.
- 5th.—Increased power, without the loss of motion, and many other advantages, which can be explained by an examination of the beautiful model now on exhibition at F. West & Co's, No. 78 Dauphin street, Mobile, Ala., who are the sole agents of this Press for the city of Mobile and the country at large.

The Iron Work is being daily cast by the Mobile Foundry, as cheap and smooth as it could be done north of Mason and Dixon's line.

Messrs. F. WEST & CO. are prepared to receive and supply orders at once to the satisfaction of all demands. Come and see for yourselves. Price not over \$100.

WOOD & MANN'S

PORTABLE ENGINES.

(From 4-horse power to 35-horse power.)

These Engines are especially adapted for Plantation use, as, having 2 fly-wheels, they can run two gins and corn-mill, or saw mills, without the expense of shafting. They are cheaper and better than any Engines ever offered in the Southwest.

One of these Engines, (Fifteen horse power) can be seen in operation at Mississippi Penitentiary, Jackson, Miss.
